

Symantec Backup Exec™ System Recovery helps you recover your systems in minutes, not hours or days.

We know it's hard to believe, but it's true. Symantec Backup Exec System Recovery gives you the ability to restore systems in a matter of minutes. Just think, you'll be able to meet the most challenging recovery time objectives — restoring failed systems before business grinds to a halt. And saving the company from disaster is always a good career move. That you know for sure.

The gold standard in complete Windows system recovery, Backup Exec System Recovery gives you:

- **Complete system recovery in minutes** — Quickly restore systems to the same hardware, dissimilar hardware or virtual environments, without the need for lengthy, error-prone manual processes.
- **Rapid, Granular Exchange Recovery** — Restore individual email messages, folders, mailboxes and attachments with the new Exchange Retrieve Option.
- **Restore Systems to Virtual Environments** — Seamlessly convert physical systems to virtual environments, including VMware ESX Server or Microsoft Virtual Server, and back again, providing greater flexibility in managing system recovery.
- **Integration with Google™ Desktop and Backup Exec Retrieve** — Enables end user recovery of files and folders using a common web-browser interface for fast and simple recovery, without utilizing IT resources.
- **Centralized Management** — Provides simple, at-a-glance management of all backup and recovery processes across your entire organization via Backup Exec System Recovery Manager.
