

## “We Couldn’t Have Done It Without Systems Architecture”

“It was a very big job and would have been extremely stressful were it not for the dedication, competence and impeccable management of Systems Architecture, we couldn’t have done it without them.”

**Emma Whiting**  
IT Manager  
Nunn Hayward

**Nunn Hayward** is a successful accountancy and financial planning firm with offices along the M25 corridor in New Malden and Gerrards Cross. The company’s specialist areas include taxation, corporate planning, consultancy, payroll, fee protection and audit. It prides itself on its user-friendly, flexible and personal approach to its clients.

### Infrastructure upgrade

Last year the company, which has been employing Systems Architecture to handle its IT hardware and software requirements for the past seven years, briefed the firm on a major project that involved the implementation of the Blade Server System Infrastructure. “It was a very big job and would have been extremely stressful were it not for the dedication, competence and impeccable management of Systems Architecture,” says Nunn Hayward’s IT Manager Emma Whiting. “We couldn’t have done it without them.”

### The professionals

The success of the Blade Server implementation was typical of Systems Architecture’s efficiency and professionalism, says Emma. “They are really good. They manage projects well, are great at fixing teething problems, and they always sort out any problems that we might be experiencing really quickly. They are competitively priced, too, but to be honest, it is for the sheer quality of their service and customer support that we have continued to use them for all these years.”

### Pain-relief

The fact that Systems Architecture carries out both the sourcing and the supplying of IT hardware and

software, really takes the strain off the busy Nunn Hayward offices, says Emma. “They eliminate the headaches. They run around and find the best solutions – no matter how unsure we might be about exactly what it is that we need. They always source the most competitive quotes, and step in to support us with our IT issues when we need them, leaving us with the time to get on with our jobs.”

### Final verdict

“We trust them and they trust us and I would recommend Systems Architecture to anybody,” concludes Emma.

#### About Systems Architecture

Systems Architecture Ltd was formed at the beginning of 1998 to offer a professional, yet personalised, service to existing and new business clients. Our employees encompass both IT and communications professionals.

Accredited as partners of the leading manufacturers ensures we obtain the very latest products; Independent of the 300+ distributors in the Channel ensures optimum availability; Holding limited stock ensures overhead costs are reduced to a minimum; and specialising in the Information Technology field ensures greater purchasing power; all leading to competitive pricing for our clients.
